HAKKIMIZDA

Firmamız TYT Pack System sanayi sektörlerindeki artan ürün koruyucu seperatör ihtiyaçlarını karşılamak üzere 2017 yılı itibari ile faaliyetlerine başlamıştır. İstanbul Silivri' de yer alan firmamız ağırlıklı olarak beyaz eşya, otomotiv ana ve yan sanayilerine hizmet vermektedir. Firmaların görsel ve kozmetik parçalarının üretilmesinden depolanmasına ve montaj aşamasına kadar geçen süreçlerde ürünlerin zarar görmesini engelleyen her parçaya uygun özel tasarım seperatörler ve PP levha ile güçlendirilmiş özel ebatlı Corex kasalar üretmektedir.

Beyaz eşya ve otomotiv sektörleri üzerine başlıca üretimlerimiz ve uzmanlık konularımız Dunnage, Tekstil Seperatör, Eva Seperatör, PP Seperatör, Sünger Seperatör, Laminasyon Seperatör, özel ebatlı PP Corex kutular, Trolley ve Metal Palet gibi projelere özel tasarımlar olarak ön plana çıkmaktadır.

Sektörün önde gelen birçok firmasına yenilikçi tasarımlarımız ile her nokta da yardımcı olmaktadır. Firmaların projelerine özel akılcı çözümler üreterek kaliteli ve maliyeti düşük tasarımlar yapmayı her zaman ön planda tutmaktayız. Bu nokta da beraber çalıştığımız Türkiye ve dünya çapında birçok firma ile iş ortaklığını esas almaktayız.

Firmamız tecrübeli ve dinamik kadrosu ile gelişmiş teknolojiyi kullanarak, yaptığı ar-ge yatırımları ve başarılı satış/pazarlama stratejisi ile hem Türkiye hem de dünya çapında firmalar ile stratejik ortaklıklar yaparak büyümeyi hedeflemektedir. Aynı zamanda kazandığımız deneyimler ile her zaman sektörün öncüleri arasında yer almayı amaçlamaktayız.

Hipaş Plastik grup şirketleri arasında yer alan firmamız Hipaş' ın uzun yıllardır sektörde elde ettiği tecrübesinden de faydalanarak kendini geliştirerek ilerlemeyi ve ülke ekonomisine değer katmayı ilke edinmektedir.

ABOUT US

Our company TYT Pack System started its activities as of 2017 in order to meet the increasing product protective divider needs in the industrial sectors. Located in Istanbul Silivri, our company mainly serves the white goods, automotive main and sub-industries. It produces specially designed dividers suitable for every part that prevents the products from being damaged during the processes from the production of the visual and cosmetic parts of the companies to the storage and assembly stage, and special sized Corex crates reinforced with PP sheet.

Our main productions and specializations for the white goods and automotive sectors stand out as designs specific to projects such as Dunnage Solutions, Textile Divider, Eva Divider, PP Divider, Sponge Divider, Lamination Divider, special sized PP Corex boxes, Trolley and Metal Pallet.

We help many leading companies in the sector with our innovative designs at every point. We always prioritize making high-quality and low-cost designs by producing rational solutions specific to the projects of the companies. At this point, we are based on business partnerships with many companies in Turkey and around the world that we work with.

Our company aims to grow by using advanced technology with its experienced and dynamic staff, by making strategic partnerships with companies both in Turkey and around the world, with its R&D investments and successful sales/marketing strategy. At the same time, we always aim to be among the pioneers of the sector with the experience we have gained.

Our company, which is among the Hipaş Plastik group companies, adopts the principle of improving itself and adding value to the country's economy by benefiting from the experience of Hipaş in the sector for many years.

PROJE YÖNETİM SÜRECİ / PROJECT MANAGEMENT PROCESS

1.	Danışmanlık Consultancy		Tasarım Design
3.	Prototip Prototype	4.	Test
5.	Teklif ve Onay Offer and Approval	6.	Üretim Production
7.	Teslimat Delivery	8.	Müşteri Memnuniyeti Customer Satisfaction

Proje Yönetim Süreci

Proje sürecinde firmamız müşterileri ile işbirliği yaparak çözüm odaklı olarak çalışmaktadır. Yaptığımız çalışmalar ile projelere özel tasarımları ön planda tutmaktayız. Bu sayede müşterilerimizin ihtiyaçlarını tam anlamıyla karşılamaktayız. Maliyet, verimlilik, zaman ve memnuniyet her zaman için önceliklerimiz arasında yer almaktadır. Proje süreci firmamız tarafından bir döngü ile yönetilmektedir. Bu döngü içerisinde ki adımlar, danışmanlık, tasarım, prototip, test, teklif/onay, üretim, teslimat ve müşteri memnuniyeti olarak sıralanmaktadır.

Project Management Process

During the project process, our company works solution oriented with our customers collaboratively. We prioritise special designs for projects with our studies. Thus, we supply needs of the customers completely. Cost, efficiency, time, and pleasure are always our priorities. Project process is managed by our company with a cycle. Steps in the cycle: consultancy, design, prototype, test, tender/approval, production, delivery and customer satisfaction.

Corex ve dunnage kutuların ölçüleri tamamen müşterilerin projelerine özel olarak belirlenmektedir. Farklı renklerde ve kalınlıklarda PP (Polipropilen) levhalardan üretilmektedir. Plastik ve alüminyum çıta ile güçlendirilebilir. Projeye göre boş veya seperatörlü olarak tasarlanabilmektedir.

Avantajları

- Düşük maliyet
- Kişiselleştirilebilir ebat ve tasarım
- Hafif ve sağlam yapı
- Uzun ömürlü
- Verimli istifleme

The dimensions of corex and dunnage boxes are determined entirely for the projects of the customers. It is produced from PP (Polypropylene) sheets in different colors and thicknesses. It can be strengthened with plastic and aluminum lath. It can be designed as empty or with a separator according to the project.

Advantages

- Lower costs
- Customizable size and design
- Light and robust construction
- Long lasting
- Efficient stacking

PP tasarımlı separatörlerin lot (yuva) sayıları ve ölçüleri tamamen müşterilerin projelerine özel olarak belirlenmektedir. Kartonplast separatör olarak bilinen bu separatörlerde kullanılan PP kalınlığı ve renkleri yine talep doğrultusunda belirlenmektedir. PP tasarımlı separatörler corex kutu, plastik kasa ve konteyner içine uygulanabilmektedir. Taraklı separatör olarak üretilebilmektedir.

Paketlenecek ürünün ağırlık ve boyutlarına göre özel olarak tasarlanıp, hassas bir taşımayı ve saklamayı garanti etmektedir.

Avantajları

- Uzun ömürlü ve sağlam
- Düşük maliyet
- İstifleme de ekonomik
- Özel ebat ve tasarım seçenekleri
- Pratik düzen oluşturma
- Hafif yapı
- Darbeye ve kimyasala karşı dayanıklı

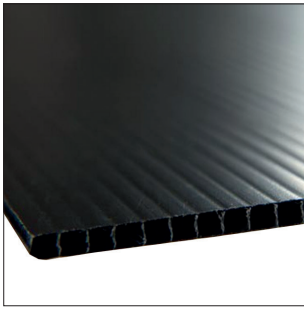

The lot (slot) numbers and dimensions of the PP designed separators are determined exclusively for the projects of the customers. The PP thickness and colors used in these separators, also known as Kartonplast separators, are determined upon request. PP designed separators can be applied inside corex boxes, plastic crates and containers.

It can also be produced as a combed separator. It is specially designed according to the weight and dimensions of the product to be packed and guarantees a sensitive transport and storage.

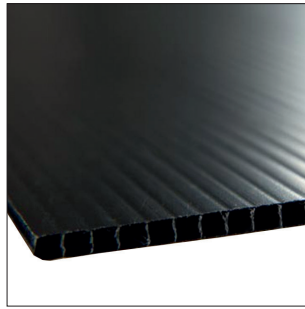

Advantages

- Long lasting and robust
- Lower costs
- Stacking is also economical
- Special size and design options
- Practical layout creation
- Lightweight construction
- Impact and chemical resistant

Eva tasarımı seperatörlerin lot (yuva) sayıları, eva kalınlığı ve renkleri tamamen müşterilerin projelerine özel olarak belirlenmektedir. Özellikle otomotiv, beyaz eşya, savunma, elektronik, havacılık, perakende ve medikal sektörlerinde hasar görmemesi gereken parça ve materyallerin düzenli bir şekilde dizilmesini ve güvenli bir şekilde saklanmasını sağlamak amacıyla talep görmektedirler. ESD özellikli eva seçenekleri de mevcuttur. Eva tasarımı seperatörler corex kutu, kasa ve konteyner içerisine uygulanabilmektedir.

Avantajları

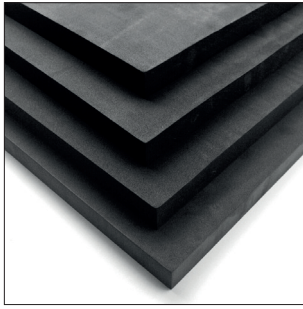

- Uzun ömürlü ve dayanıklı
- Düşük maliyet
- Deformasyon önleme
- Özel ebat ve tasarım
- Darbeye, çizilmeye, kırılmaya karşı koruma
- Kolay ve verimli istifleme

The lot (slot) numbers, eva thickness and colors of Eva designed separators are determined exclusively for the projects of the customers. They are especially in demand in the automotive, white goods, defense, electronics, aviation, retail and medical sectors in order to ensure that parts and materials that should not be damaged are arranged in an orderly manner and stored safely. ESD-enabled eva options are also available. Eva designed separators can be applied inside corex boxes, crates and containers.

Advantages

- Long lasting and durable
- Lower costs
- Deformation prevention
- Custom size and design
- Protection against impact, scratch, breakage
- Easy and efficient stacking

Kumaş tasarımıli seperatörlerin lot (yuva) sayıları, kumaş yoğunluğu ve türü tamamen müşterilerin projelerine özel olarak belirlenmektedir. Ayrıca farklı renklerde ve yoğunlukta Spunbond Tela, Evolon®, Tyvek®, Fortis, Beka, Penye, Branda, Denim, Kadife, Yanmaz kumaş vb. kumaş seçenekleri mevcuttur. Özellikle hassas parçaların taşınmasında ve saklanmasında tercih edilmektedirler. Kumaş tasarımıli seperatörler corex kutu, plastik kasa ve konteyner içerisine uygulanabilmektedir. Bu seperatörler aynı zamanda tekstil seperatörler olarak bilinmektedir.

Avantajları

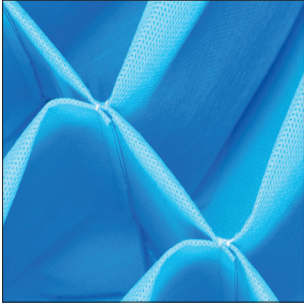

- Düşük maliyet
- Kişiselleştirilebilir ebat ve tasarım
- Deformasyon önleme
- Uzun ömürlü ve dayanıklı
- Kolay ve verimli istifleme
- Kırılgan, boyalı ve çizilmeye karşı hassas parçalara etkili koruma

The number of lots (slots), fabric density and type of fabric designed separators are determined exclusively for the projects of the customers. In addition, Spunbond Tela, Evolon®, Tyvek®, Fortis, Beka, Combed Cotton, Canvas, Denim, Velvet, Fireproof fabric etc. in different colors and densities. Fabric options are available. They are especially preferred for the transportation and storage of sensitive parts. Fabric designed separators can be applied inside corex boxes, plastic cases and containers. These separators are also known as textile separators.

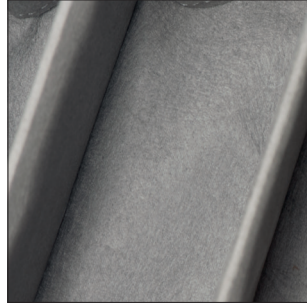

Advantages

- Lower costs
- Customizable size and design
- Deformation prevention
- Long lasting and durable
- Easy and efficient stacking
- Effective protection for fragile, painted and scratch sensitive parts

Laminasyon tasarımı seperatörlerin lot (yuva) sayıları, kullanılan PP kalınlığı, yoğunluğu ve kumaş türü tamamen müşterilerin projelerine özel olarak belirlenmektedir. Laminasyon tasarımı seperatörler corex kutu, plastik kasa ve konteyner içerisine uygulanabilmektedir. PP üzerine kumaş kaplanarak nihai hâline gelmektedir. Aynı zamanda kaplamalı seperatör olarak adlandırılmaktadır. Laminasyon Tasarımlı Seperatörler genellikle endüstriyel üretim yapan işletmelerde çizilmemesi gereken önemli parçaların düzenli bir şekilde istiflenmesi ve güvenli bir şekilde saklanması için yoğun olarak tercih edilmektedir. Özellikle otomotiv, beyaz eşya, savunma ve elektronik sektörleri bu seperatörü ürettikleri parça ve ürünleri korumakta kullanmaktadır.

Avantajları

- Sağlam ve uzun ömürlü
- Deformasyona karşı etkili
- İstenilen ebat ve tasarım seçeneği
- İstifleme de ekonomik
- Pratik dizilim imkanı
- Düşük maliyet
- Çizilmeye karşı etkin koruma

The number of lots (slots), the PP thickness, density and fabric type of the lamination designed separators are determined exclusively for the projects of the customers. Separators with lamination design can be applied inside corex boxes, plastic cases and containers. It is finalized by covering fabric on PP. It is also called as coated separator. Lamination Design Separators are generally preferred in industrial production enterprises for the regular stacking and safe storage of important parts that should not be scratched. Especially the automotive, white goods, defense and electronics sectors use this separator to protect the parts and products they produce.

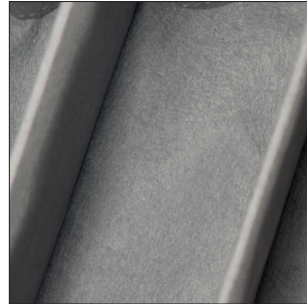

Advantages

- Robust and long-lasting
- Effective against deformation
- Desired size and design option
- Stacking is also economical
- Practical sequencing
- Lower costs
- Effective protection against scratches

ESD tasarımlı seperatörlerin lot (yuva) sayıları, kullanılan Eva, PP kalınlığı ve kumaş türü tamamen müşterilerin projelerine özel olarak belirlenmektedir. ESD tasarımlı seperatörler antistatik corex kutu, antistatik plastik kutu, kasa ve konteyner içerisine uygulanabilmektedir. ESD Tasarımlı Seperatörler endüstriyel üretim yapan ve antistatik unsurunun önem arz ettiği işletmelerde özellikle tercih edilmektedir. Tercih eden sektörlerin başında otomotiv, beyaz eşya, savunma ve elektronik sektörleri gelmektedir. Bu sektörlerde üretilen bazı parçaların antistatik olarak seperatör içerisinde saklanması ve düzenli dizilmesi gerekmektedir. Bu nokta da üretmiş olduğumuz ESD tasarımlı seperatörler ön plana çıkmaktadır.

Avantajları

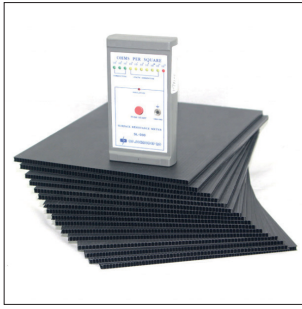

- Antistatik malzeme ve yapı
- Özel ebat ve tasarım
- Ekonomik istifleme
- Sağlam ve uzun ömürlü

The number of lots (slots), the Eva and, PP used thickness and the fabric type of the ESD designed separators are determined exclusively for the projects of the customers. ESD designed separators can be applied in antistatic corex boxes, antistatic plastic boxes, crates and containers. ESD designed separators are especially preferred in enterprises that make industrial production and where the antistatic element is important. Automotive, white goods, defense and electronics sectors are the leading sectors that prefer it. Some parts produced in these sectors need to be stored in an antistatic separator and arranged regularly. At this point, the ESD designed separators we have produced come to the fore.

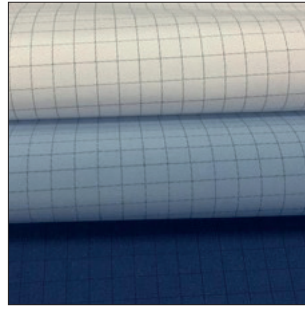

Advantages

- Antistatic material and construction
- Custom size and design
- Economic stacking
- Robust and long-lasting

Ray sistemli separatörlerin lot (yuva) sayıları, kullanılan kumaş türü ve yoğunluğu tamamen müşterilerin projelerine özel olarak belirlenmektedir. Ayrıca farklı renklerde ve yoğunlukta kumaş seçenekleri mevcuttur. Ray sistemli separatörler corex kutu, kasa ve konteyner içerisine uygulanabilmektedir. Özellikle otomotiv, beyaz eşya ve elektronik sektörlerinde ray sistemleri sayesinde yaygın olarak kullanılmaktadırlar. Ray sistemi sayesinde çalışanlar için ergonomik bir kullanım sağlamaktadırlar. Böylece iki ve daha fazla kat istifleme sunmaktadırlar.

Avantajları

- Sağlam ve uzun ömürlü
- Ray sistemi sayesinde birden fazla kat imkanı
- Çalışanlar için ergonomik istifleme imkanı
- Daha fazla ürün yerleştirme imkanı
- Daha verimli kullanım
- Maliyet düşürme
- Deformasyon önleyici
- Kişiselleştirilebilir ebat ve tasarım

The number of lots (slots), the type of fabric used and the density of the rail system separators are determined exclusively for the projects of the customers. There are also fabric options in different colors and densities. Rail system separators can be applied inside corex boxes, crates and containers. They are widely used, especially in the automotive, white goods and electronics sectors, thanks to their rail systems. Thanks to the rail system, they provide an ergonomic use for the employees. Thus, they offer stacking of two or more floors.

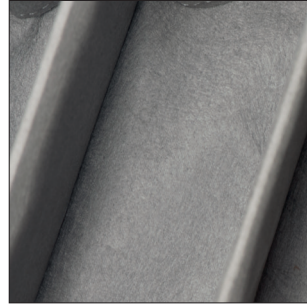

Advantages

- Robust and long-lasting
- Possibility of multiple floors thanks to the rail system
- Ergonomic stacking possibility for employees
- Possibility to place more products
- More efficient use
- Cost reduction
- Anti-deformation
- Customizable size and design

Yatay seperatörlerin boyutları, kalınlığı ve rengi tamamen müşterilerin taleplerine özel olarak belirlenmektedir. Bu seperatörler Kartonplast seperatör olarak adlandırılmaktadır. Yatay seperatörler corex kutu, plastik kasa ve konteyner içerisine uygulanabilmektedir. Ürünleri birbirinden ayırmakta ara katman olarak kullanılabilir. Yatay Seperatörler endüstriyel faaliyet gösteren işletmelerde yoğun olarak tercih edilen seperatörlerin başında gelmektedir. Özellikle otomotiv, beyaz eşya, savunma, elektronik, medikal, perakende, gıda ve içecek sektörlerinde tercih edilen seperatörlerdir. Bu sektörlerde üretilen parça ve ürünlerin birbirine temas etmeden ve güvenli bir şekilde saklanmasını sağlamaktadır.

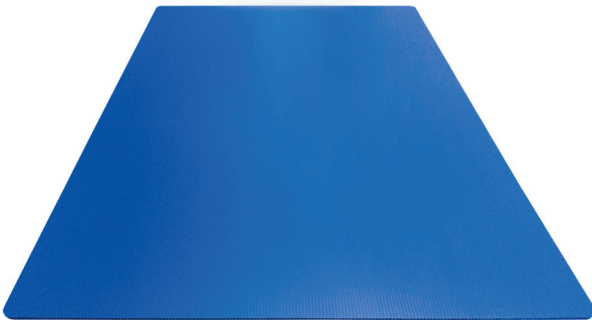

Avantajları

- Uzun ömürlü ve sağlam
- Düşük maliyet
- İstifleme de ekonomik
- Özel ebat ve tasarım seçenekleri
- Pratik düzen oluşturma

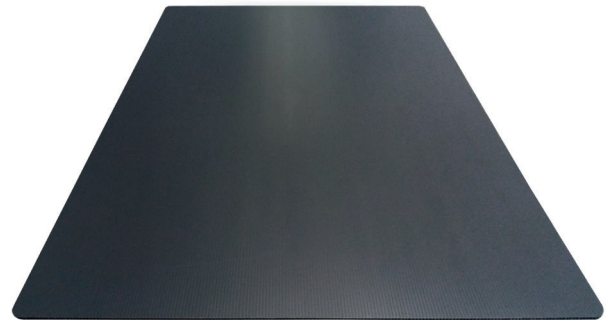

The dimensions, thickness and color of the horizontal separators are completely determined according to the demands of the customers. These separators are also called Kartonplast separators. Horizontal separators can be applied inside corex boxes, plastic crates and containers. It can be used as an intermediate layer to separate the products from each other. Horizontal Separators are one of the most preferred separators in industrial enterprises. They are the preferred separators especially in the automotive, white goods, defense, electronics, medical, retail, food and beverage sectors. It ensures that the parts and products produced in these sectors are stored safely and without contact with each other.

Advantages

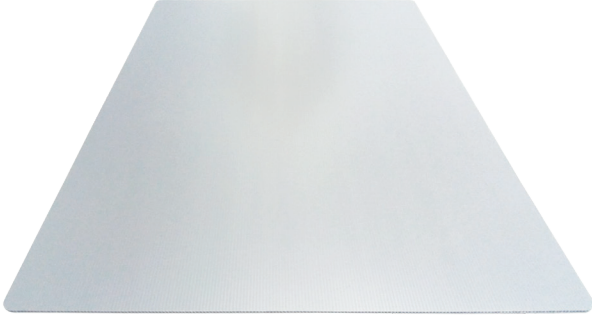

- Long lasting and robust
- Lower costs
- Stacking is also economical
- Special size and design options
- Practical layout creation

ECOPACK akıllı palet taşıma sistemlerinin ölçüleri müşterilerin talepleri doğrultusunda belirlenmektedir. Açılır önyükleme kapak seçeneği mevcuttur. İstenirse ECOPACK içerisine müşterilerin talepleri doğrultusunda seperatör uygulanabilmektedir. Katlanır palet yapısı sayesinde yer tasarrufu sağlar. EcoPACK Akıllı Palet Taşıma Sistemleri endüstriyel üretim yapan işletmelerin ürettikleri parça ve ürünlerin taşınmasında yaygın olarak kullanılmaktadır. Özellikle otomotiv, beyaz eşya, savunma, elektronik, perakende, gıda ve içecek sektörleri tarafından tercih edilmektedir. Büyük çapta parçaların taşınmasında kullanılmasının yanı sıra, içerisine uygulanan farklı seperatörler ile küçük çapta parçalarında taşınmasında aktif olarak kullanılabilir.

Avantajları

- Sağlam ve uzun ömürlü
- Katlanan yapı ile yer tasarrufu
- Kişiselleştirilebilir ebat ve tasarım
- Maliyet düşürme
- Kolay ve verimli istifleme
- Çalışanlar için pratik yükleme kapakları
- Suya ve güneşe dayanıklı
- Neme ve toza karşı koruma
- Kolay taşıma ve forklift uyumu
- Hafif yapı

The dimensions of ECOPACK smart pallet handling systems are determined in line with the demands of the customers. Front loading flap option is available. If desired, a separator can be applied to ECOPACK in line with the demands of the customers. Thanks to its folding pallet structure, it saves space. EcoPACK Smart Pallet Transport Systems are widely used in the transport of parts and products produced by industrial production enterprises. It is especially preferred by the automotive, white goods, defense, electronics, retail, food and beverage sectors. In addition to being used for the transportation of large-scale parts, it can be actively used in the transportation of small-scale parts with the different separators applied inside.

Advantages

- Robust and long-lasting
- Space saving with folding structure
- Customizable size and design
- Cost reduction
- Easy and efficient stacking
- Practical loading hatches for employees
- Water and sun resistant
- Protection against moisture and dust
- Easy transport and forklift compatibility
- lightweight construction

Ekonomik Taşıma Döngüsü
Economic Transport Cycle

Özel tasarımı endüstriyel ambalajların ölçüleri tamamen müşterilerin projelerine özel olarak belirlenmektedir. Kullanılan metal, PP, kumaş, eva, sünger, köpük vb. malzemeler projeye göre belirlenmektedir. Ayrıca farklı ürün kombinasyonları ile farklı ürünlerin üretimi söz konusudur. Sabit plastik kasa, konteyner, metal palet veya trolley taşıma arabası olarak tasarlanabilmektedir. Özel Tasarımlı Endüstriyel Ambalajlar endüstriyel alanda faaliyet gösteren birçok sektörde kullanılmaktadır. Ürün gamımızda yer alan farklı ürünlerin kombinasyonu ve tasarımı ile oluşturulan bu özel tasarımı ambalajlar özellikle otomotiv, beyaz eşya, savunma, elektronik, perakende, medikal, gıda ve içecek sektörleri tarafından tercih edilmektedir.

Avantajları

- Uzun ömürlü ve sağlam
- Kişiselleştirilebilir ebat ve tasarım
- Düşük maliyet
- Verimli ve ekonomik istifleme

The dimensions of specially designed industrial packaging are determined exclusively for the projects of the customers. Used metal, PP, fabric, eva, sponge, foam etc. Materials are determined according to the project. In addition, different products are produced with different product combinations. It can be designed as a fixed plastic crate, container, metal pallet or trolley transport trolley. Specially Designed Industrial Packaging is used in many sectors operating in the industrial field. These specially designed packages, created by the combination and design of different products in our product range, are especially preferred by the automotive, white goods, defense, electronics, retail, medical, food and beverage sectors.

Advantages

- Long lasting and robust
- Customizable size and design
- Lower costs
- Efficient and economical stacking

138 Lot Branda Seperatörlü Metal Araba / 138 Lots Metal Trolley With Canvas Divider

Dinamik raf ve endüstriyel taşıma sistemlerinin ölçüleri, lot sayıları kullanılan alüminyum, karbon ve çelik borular, bağlantı elemanları ve kumaş türleri tamamen müşterilerin projelerine özel olarak belirlenmektedir. Ayrıca ray sistemi eklenerek üzerinde kasaların dinamik olarak hareket ettirilmesi sağlanabilir. Modüler yapısı sayesinde daha sonradan ilave yapı ekleme imkânı sunmaktadır. Genellikle endüstriyel üretim yapan işletmelerde tercih edilmektedir. Özellikle otomotiv, beyaz eşya, savunma, elektronik, medikal, perakende, gıda ve içecek sektörlerinde parça ve ürün üretiminde yoğun olarak kullanılmaktadır. Bu sistemler sayesinde üretilen ürünlerin veya üretimde kullanılan parçaların düzenli olarak üretim sürecine dahil olması sağlanmaktadır.

Avantajları

- Uzun ömürlü ve sağlam
- Düşük maliyet
- Verimli alan kullanımı
- Çalışanlar için ergonomik
- Hafif yapı
- Üretim süreci hızlandırma etkili

The dimensions of dynamic rack and industrial transport systems, the number of lots used, aluminum, carbon and steel pipes, fasteners and fabric types are determined exclusively for the projects of the customers. In addition, by adding a rail system, it is possible to dynamically move the crates on it. Thanks to its modular structure, it offers the opportunity to add additional structures later. It is generally preferred in enterprises engaged in industrial production. It is used intensively in the production of parts and products, especially in the automotive, white goods, defense, electronics, medical, retail, food and beverage sectors. Thanks to these systems, it is ensured that the products produced or the parts used in production are regularly included in the production process.

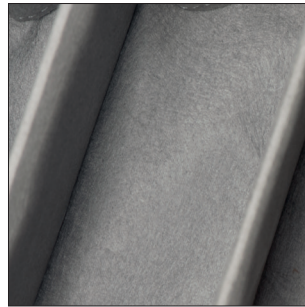

Advantages

- Long lasting and robust
- Lower costs
- Efficient use of space
- Ergonomic for employees
- lightweight construction
- Speeding up the production process

The dimensions of the folding metal pallets and the production of the metal as galvanized or painted are completely determined specifically for the projects of the customers. Also, different color options are available. If desired, a separator can be applied inside the folding metal pallets.

Folding Metal Pallets are used extensively in many sectors that carry out industrial production activities. It is especially preferred in the transportation of heavy parts in the automotive, white goods, defense and food sectors and in the transportation of food products.

Advantages

- Robust and long-lasting construction
- Space saving with folding frame
- Efficient and economical stacking
- custom sized design
- Possibility of stacking
- Practical storage covers
